

Grading Checklist

■ Final Exam Grading Checklist – Applications of Large Language Models

****Use this one-pager while scoring each submission.****

****Student Name:**** _____

****TA Name:**** _____

****Total Score:**** ____ / 100

Part A – Prompting & Decoding (50 pts)

Criterion	Max Points	Awarded	Notes
Code correctness – at least 2 prompt mods + 2 decoding strategies; code runs	20		
Commentary – 2–3 sentences per change, explains rationale	10		
Evaluation table – completed for 5 queries, includes scores + short notes	10		
AI/tool reflection – 3–4 sentences, honest about use & reliability	10		
Subtotal A	**50**		

Part B – Retrieval & Evaluation (50 pts)

Criterion	Max Points	Awarded	Notes
Code correctness – 1 retrieval modification (chunking, embeddings, or re-ranking); code runs	20		
Commentary – 2–3 sentences explaining modification & trade-offs	10		
Evaluation table – completed for 5 queries (precision, recall, relevance + notes)	10		
AI/tool reflection – 3–4 sentences on tool use	10		
Subtotal B	**50**		

■ Common Deductions

- Missing evaluation entries → deduct proportionally
- Commentary too vague (e.g., “I changed prompt to improve output”)
- No reflection on AI/tool use → **** -10 automatically ****
- Non-functional code → award partial if intent is clear in commentary

■ Overall Score

****Total (A+B):**** ____ / 100

****Grade Level (for TA reference):****

- 90–100 = Excellent
- 80–89 = Proficient
- 70–79 = Developing
- <70 = Needs Improvement
